

New breakthroughs for
wounds that won't heal.

**Introducing The Wound Healing
& Hyperbaric Medicine Center
at St. Mary Medical Center.**

Are you living life from the sidelines because a troubling wound just won't heal? You're not alone. Almost seven million Americans suffer from wounds associated with diabetes complications, other vascular disorders, pressure sores, and trauma injuries.

Now there's new relief for the frustrating struggle to heal your wound.

At the St. Mary Wound Healing & Hyperbaric Medicine Center, medical experts design individualized,

multidisciplinary treatment plans using the most advanced wound care therapies available today.

Two hyperbaric oxygen chambers bring patients a highly successful breakthrough treatment using pressurized oxygen to stimulate the wound-healing process. Other state-of-the-art solutions include the latest approaches in infectious disease management, physical therapy, vascular evaluation, and nutritional management.

**Don't let a problem wound slow you down. Start healing now.
